Aeros

A DIFFERENT WAY TO I.T.

Starting January 1, 2022 CCS Technologies will become Aeros IT Group! For almost 50 years we have been dedicated to our client's long-term success. Our personal service remains the same, but our new name reflects our innovative and proactive approach. We wanted you to be aware of this name change prior to receiving your next invoices starting January 1. We are not being bought by another company nor are we changing anything about our service and support. The change in name allows us to simplify our message and differentiate us from the rest. If you know a business who is looking for a new IT company to assist with their IT needs, remember to mention **Aeros!**

End of Year Budgets

If you are nearing the end of your 2021 budget or planning for next year, now might be the time to replace some of your computers. We have many business-grade laptops and desktop computers which are becoming increasingly hard to find. Our systems come pre-prepped and ready to install at your location. Furthermore, if you are a ProVent customer, we are able to audit your systems to help you determine whose PC should be replaced next. Whether it be related to the age of the computer or the speed of the processor and hard drive, we can get you an estimate on replacement costs and get the replacement scheduled when it's convenient for you and your business.

Windows 11

Windows 11 has been released to the general public and is now being pushed out as an option. While this will eventually be the path that nearly everyone will follow, at this point we recommend that you do NOT install this upgrade unless you know for certain that all your software will work with Windows 11! The new Windows 11 design is a pretty radical departure from the interface we are all accustomed to. But there are also changes to the underlying operating system that may cause issues with software you already have installed.

Our team of technicians can assist you with determining if Windows 11 will work for you and we can assist with the upgrade if you choose to move forward. Just keep in mind, it's a big change and it may be difficult (not necessarily impossible) to go back to Windows 10 if you don't like it. We have not pushed this upgrade to our ProVent customers yet.
